

**FLOW
SOLUTIONS**

QA-01.1 HSEQ Policy

PG's, Health, Safety, Environmental and Quality Policy

PG Flow Solutions are dedicated to take good care of our employees. We all make the highest efforts to meet or exceed our customers' expectations for safe, competent and sustainable delivery of flow solutions, systems, products and services.

PG acknowledge this as our success factors for continual growth and we commit to demonstrate this by:

- *Continual improve our performance and reduce the environmental impact from our activities to enhance satisfaction from workers, customers and other interested parties*
- *Promote a culture in which we all have the belief and commitment to achieve our goal of zero harm to people, protect the environment and provide high quality products and services to customers.*
- *Recognize that every individual worker has responsibility for PG's QHSE performance by give information, training, supervision or provide physical, human and financial resources*
- *Create and sustain a safe and healthy working environment for all workers*
- *Compliant with applicable legal requirements and regulations and maintain systems and practices which are according to ISO 9001:2015, ISO 14001:2015 and ISO 3834-2:2006*
- *Evaluate the environmental management system and environmental objectives at regular intervals with the aim of improving both the system and the environmental performance*
- *PG will emphasize and integrate environmental considerations early in the planning and implementation of projects and in the procurement of products and materials*
- *Actively minimise and control any health, safety and environmental risks*
- *Provide reliable, safe and long-lasting products*

Top Management monitor goals, objectives and targets and annually review this policy and the performance of the Integrated Management System.

It's all about the people who care more!
